Wonderful Winnipeg

The Gateway to the Canadian West

75-

THE STORY OF WINNIPEG is one of the most marvellous and impressive records of growth on the continent. Thirty-five years ago Winnipeg's population was less than 1,000, and the school attendance was only 35 pupils; it was but a post of the Hudson's Bay Company, without churches, streets or railroads, and but a few years previously the Indians chased herds of buffalo across the prairie where the city now stands. It is now the railroad and business centre of the Canadian West. Twenty-seven railway tracks radiate from it, and the C.P.R. yard here with its 110 miles of sidings is the largest in the world controlled by a single corporation. Winnipeg is the chief central point of the Canadian National and Canadian Government railway systems, these roads having built a Union Station at a cost of \$2,000,000. The annual freight receipts handled by all roads amount to over 2,000,000 tons. Six thousand railway employees reside in the city. It is in the famous Red River Valley and surrounded by good farming, timber and mining districts, with extensive lake fisheries. The streets of the city are generally wide, the principal avenues being 132 feet; 178 miles of streets are paved with asphalt, block and macadam. The area of 15,287 acres has been covered by 255 miles of sewers, 330 miles of paved and graded streets (117 miles of which are boulevarded), and 527 miles of sidewalks. Approximately 289 miles of water mains have been laid down since the city's incorporation 36 years ago. In 1890 the proportionate assessment value of the city was \$18,612,410; in 1900, \$25,077,460; in 1902, \$28,615,810; in 1905, \$62,727,630; in 1906, \$80,511,727; in 1909, \$131,402,800; in 1911, \$172,677,250; in 1916, \$273,732,370, and in 1918, \$252,528,800. Winnipeg is the wholesale and jobbing centre of Manitoba, Saskatchewan, and Alberta. It has forty-two Banks and branches in the city. Bank clearings—1900, \$106,956,720; 1905, \$369,868,179; 1906, \$504,585,914; 1907, \$599,667,376; 1908, \$614,111,801; 1909, \$770,649,332; 1910, \$953,415,287; 1916, \$2,061,795,257, and in 1918, \$2,362,734,211. The city contains 122 churches and missions, 45 public schools, with an enrollment exceeding 30,000; also six parochial schools,

with 1,200 pupils; six colleges, a university, provincial agricultural college, academies, ladies' schools, the Provincial Government buildings, Court house, gaols, chief offices of the Dominion Government in the West, fine city hall, a free library, costing \$140,000; two railway depots, costing over \$2,000,000 each; extensive markets, up-to-date fire, police, and water systems. The electric street railway operates 317 cars on 90 miles of city tracks and 63 miles of suburban lines. A permanent and volunteer military force is located here. These facts give some idea of the progress being made. The grain business of the Canadian West centres in Winnipeg, and for the last year the inspections exceeded 179,981,800 bushels, placing Winnipeg as the greatest grain market on the American continent. This is evidence enough of the nature of the soil tributary to Winnipeg. In addition to agriculture, a considerable fishing business is done in the large Northern Lakes, and timber and mining enterprises are being developed on its shores. Winnipeg city owns and operates its own asphalt paving plant, its own quarry, street lighting, water works, including high pressure fire system of 300 lbs. pressure for fire protection. Winnipeg is now in a position to encourage manufacturers by affording cheap power. On the Winnipeg River, within 100 miles of the city, 60,000 h.p. is now being developed at the city's own Hydro Electric Power Plant. The Winnipeg Electric Railway is developing 40,000 h.p. The Winnipeg River Power Co. has commenced operation on the world's largest power plant, with an ultimate capacity of 156,000 h.p. Winnipeg power rates are the lowest in Canada. The value of the factory output is now estimated at \$90,000,000 annually, which is an increase of over 400 per cent. in the past 10 years. Over 23,000 factory hands now find employment in the 443 successful plants operating. Take this record in industrial growth and add to it the wholesale turnover of \$175,000,000, and the enormous grain trade handled in the city, makes Winnipeg the central market and capital city of commerce in Western Canada.
